

MEDIA SAVVY vCISO

Experienced Cyber and Content Security leadership without the expensive hire...

We join your tech team to deliver **high quality advice** on making your media production business secure

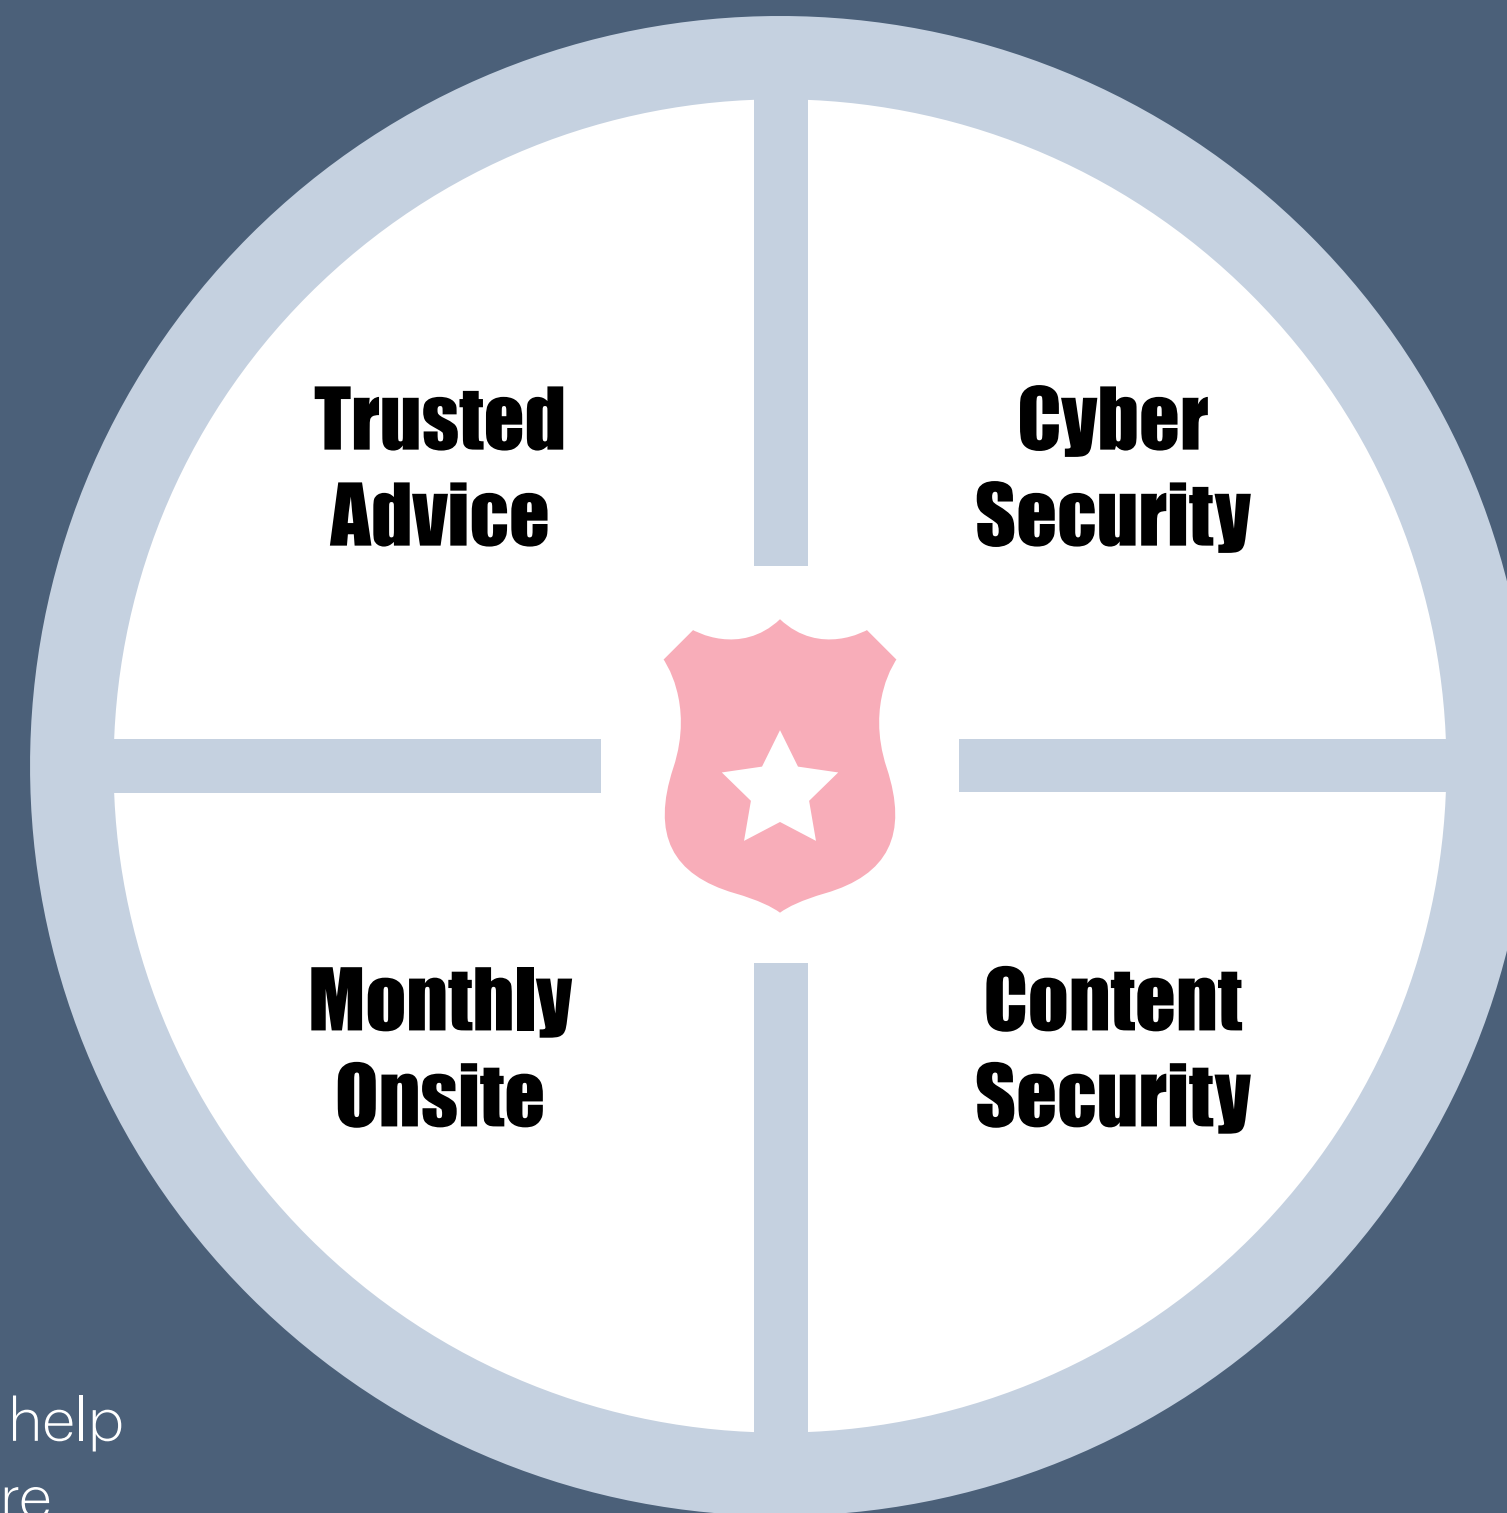

Security is never convenient, we work to minimise any negative effects on **workflow efficiency**

We are **independent**, vendor agnostic and aim to offer pragmatic, dependable advice, in simple language

Regular monthly meeting with your tech team, covering a fixed agenda and driving **continuous improvements**

Implementation tasks are **carefully evaluated** before a managed roll out with out of hours support if required

Straightforward **progress reports** for senior management help keep track of priorities and improvements to security posture

Detailed **Gap Analysis** informs priorities that matter to you, these are then mapped to a monthly task list

Monthly **Vulnerability Scan** and remediation advice included to ensure external threats are minimised

We develop a **Bespoke Playbook** for your business outlining how to deal with an attack or breach

Lean on 20+ years of **TPN** and major studio audit experience from your side of the fence

Ensure that Content Security policy and Cyber Security align perfectly with your unique business and workflows

Additional help around audit time to ensure you are ready and advice on how to approach any remediation

PACKAGED

Bespoke attack/breach response plan with named contacts, clear actions and agreed comms plan

Annual Gap Analysis to enable prioritisation of improvements and progress tracking
